Molecular Microbiology

1. Completely fill in left section and use a separate request form for each specimen type submitted.
2. For unlisted tests - call Reference Laboratory Services (206) 520-4600 or (800) 713-5198.
3. Website: http://depts.washington.edu/molmicdx   Email: molmicdx@uw.edu

F ☐

NOTE: When ordering tests for which Medicare reimbursement will be sought, physicians should only order tests which are medically necessary for diagnosis or treatment of the patient. You should be aware that Medicare generally does not cover routine screening tests, and will only pay for tests that are covered by the program and are reasonable and necessary to treat or diagnose the patient.

Testing on Direct Patient Specimens

For solid tissue, please note that we do not process more than 1 cubic cm. Submit only the portion of the specimen with the greatest diagnostic potential. Fresh specimens are recommended when possible, but we also accept formalin fixed paraffin embedded tissue. Fresh samples should be submitted frozen on dry ice. Due to the presence of normal microbiota, not all specimens are acceptable for broad-range PCR. Please refer to our website for more information on our tests, acceptable specimens and an updated order form, http://depts.washington.edu/molmicdx.

Please submit one specimen per order form. If multiple specimen "aliquots" are submitted, we will pool them, unless otherwise indicated. If multiple FFPE blocks are submitted from the same body site with an order form, shavings from a maximum of 2 PET blocks will be combined for testing.

REFLEXIVE TESTING: When suspected pathogenic microorganisms are detected, identification procedures are performed, as appropriate for the organism and specimen.

SPECIMEN SITE DESCRIPTION _____

DATE & TIME COLLECTED   ☐ AM   ☐ PM

SENDER SPECIMEN #

COMMENTS

Is patient immunocompromised?
___Yes   ___No   ___Not Known

ICD/DIAGNOSIS

BROAD-RANGE PCR
___ AFB (Only TBCPCR and MAVPCR for sputum)   NTMPCR, TBCPCR
___ Bacteria (reflex to NGS16S when multiple templates are present)   BCTPCR (NGS16S)
   ___ Standard Bacterial PCR only (not recommended)   BCTPCR
___ Fungi   FUNPCR

Next Generation Sequencing
___ Bacteria (reflex to NGS16S for poly-microbial specimens with amplifiable template)   BCTPCR (NGS16S)

PATHOGEN-SPECIFIC PCR
Requests for pathogen-specific PCRs, not listed below, will be reflexively tested by the corresponding Broad-range PCR, if applicable.

Bacteria
___ Bartonella PCR - Tissue   BRTPCR
___ Legionella PCR   LEGPCR
___ Tropheryma whipplei   TWIPCR
___ Mycoplasma, Respiratory [1]   MPNPCR
___ Mycoplasma, Genital [2]   GUMPCR
___ Mycoplasma, Miscellaneous [1,2]   MGMPCR

[1] Detects M. pneumoniae [2] Detects M genitalium, M. hominis, U. urealyticum, U. parvum

AFB
___ Mycobacterium tuberculosis Complex PCR   TBCPCR
___ *Nontuberculous Mycobacteria (AFB other than MTB Complex) PCR   NTMPCR
   Not acceptable: Sputum, see MAVPCR
___ Mycobacterium avium complex PCR (MAVPCR is part of NTMPCR testing)   MAVPCR

Fungi
___ Aspergillus PCR (detects A. fumigatus) - BAL*   ASPPCR
___ Aspergillus PCR (detects A. fumigatus) - Tissue*   ASPTIS
___ Zygomycete PCR *   ZGMPCR
___ Histoplasma PCR *   HISPCR
___ Cryptococcus PCR (detects C. neoformans and C. gattii) *   CRYPCR
___ Coccidioides PCR*   COCPCR
___ Pneumocystis PCR*   PNEPCR
   *If negative, do you want broad-range PCR for fungi (for normally sterile sites & BAL only) ___ YES ___ NO   (FUNPCR)

Parasites
___ Toxoplasma PCR   TOXPCR

SEND REPORT TO (Hospital, Clinic, Physician)
UChicago Client Services AP
5841 S. Maryland Ave.
Room J601, MC6101
Chicago, IL 60637

Testing on Cultured Organisms

ORGANISMS IDENTIFIED BY DNA SEQUENCE-BASED METHODS:
___ AFB Sequencing   Stain result_____   AFBSEQ
___ Bacterial Sequencing   Stain result_____   BCTSEQ
___ Fungal Sequencing   MLDSEQ/YSTSEQ

DETECTION OF SPECIFIC GENES
___ mecA gene   MECPCR

STRAIN TYPING
___ Bacterial Strain Typing by Whole Genome Sequencing   NGSTYP

RETURN FORMALIN-FIXED PARAFFIN EMBEDDED TISSUE TO:
